

# Panel Protection

*Using an expensive DR Panel in a portable / mobile environment can be extremely risky. You can easily reduce that burden by protecting your investment with one of our innovative DR Panel protectors. Our products contain multiple layers to absorb impact and increase weight capacity. Designed for both tethered and wireless panels, our products are strong yet lightweight offering a high degree of protection.*

**RC Imaging**  
your radiology resource

**All of our panel protection products have been tested for strength and durability by an accredited independent laboratory.**
